RANEY Clips

RANEY Clips are simple but extremely useful devices. Blood pools are often collected behind the head of patients with head injuries. It is usually not suitable to stop the resuscitation to sew a scalp wound. Raney clips allow the temporary measures to stop the bleeding until exploration and wound closure can be performed safely. Raney Clips are produced with medical grade polyurethane. Each clip is designed by ensuring equal closing pressure.

Specifications:

- Fast and easy application for prevention of bleeding.
- Atraumatic design for safe and reliable application.
- Disposable clips for unwavering cleanness and sterility.
- Overlapping jaws to ensure secure atraumatic placement.
